THE 5 FOOT FARM

Square-by-Square Succession Planting Map

🌱 THE 5 FOOT FARM SUCCESSION PLANTING MASTER LAYOUT

One Garden. Three Seasons. Maximum Harvest.

Legend

- S = Spring Crop
- U = Summer Crop
- F = Fall Crop

Each square shows:
Spring → Summer → Fall

▨ 5×5 SQUARE SUCCESSION GRID

[1] Radish → Bush Beans → Spinach | [2] Lettuce → Pepper → Kale | [3] Spinach → Cucumber → Lettuce | [4] Radish → Zucchini → Turnips | [5] Lettuce → Tomato → Arugula

[6] Carrot → Basil → Spinach | [7] Lettuce → Tomato → Kale | [8] Spinach → Pepper → Lettuce | [9] Radish → Bush Beans → Arugula | [10] Lettuce → Cucumber → Spinach

[11] Beets → Pepper → Kale | [12] Lettuce → Tomato → Arugula | [13] Spinach → Zucchini → Lettuce | [14] Radish → Bush Beans → Turnips | [15] Lettuce → Pepper → Spinach

[16] Carrot → Basil → Kale | [17] Lettuce → Tomato → Lettuce | [18] Spinach → Cucumber → Arugula | [19] Radish → Zucchini → Spinach | [20] Lettuce → Pepper → Kale

[21] Beets → Bush Beans → Spinach | [22] Lettuce → Tomato → Arugula | [23] Spinach → Pepper → Lettuce | [24] Radish → Cucumber → Turnips | [25] Lettuce → Zucchini → Spinach

---

🧭 HOW TO USE THIS LAYOUT (PUT THIS ABOVE THE GRID)

Step 1 — Plant the Spring Crop
Fill every square with the first crop listed.

Step 2 — Harvest & Replant Immediately
As soon as Spring crops finish, plant the Summer crop in the same square.

Step 3 — Finish with Fall Crops
When Summer crops slow down, replace with the Fall crop.

Result:
25 squares × 3 seasons = up to 75 harvest zones

🌿 WHY THIS LAYOUT WORKS (BUILT-IN LOGIC)

This grid follows 3 rules:

Rule 1 — Fast → Slow → Cold

- Spring = fast growers (radish, lettuce, spinach)
- Summer = heavy producers (tomato, pepper, cucumber, beans)
- Fall = cold crops (kale, spinach, arugula, turnips)

Rule 2 — Tall Crops Are Spread Out

Tomatoes, peppers, zucchini, cucumbers are **distributed evenly** so:

- No shading overload
- Better airflow
- Easier harvesting

Rule 3 — Soil Is Never Idle

Every square always has:

- Crop growing
- Crop finishing
- Or crop starting

No wasted space. No downtime.
