🌱 THE 5 FOOT FARM SUCCESSION PLANTING MASTER GRID

How to Replant the Same Space for Continuous Harvests

Legend

- 🌱 = New Direct Sow
- 🌿 = Transplant
- 🧺 = Harvest
- 🔁 = Replant Immediately After Harvest

FAST-CYCLE CROPS SUCCESSION GRID

(These are the crops that let you harvest multiple times per season in a 5×5 space)

Crop ↓ / Month →	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct
Radishes	🌱	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺	
Lettuce (Leaf)	🌱	🌱🧺	🌱🧺	🌱🧺	🌱🧺	🌱🧺	🧺	🧺
Spinach	🌱	🧺🔁	🧺		🌱	🧺🔁	🧺	🧺
Arugula	🌱	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺	
Bush Beans		🌱	🧺🔁	🧺🔁	🧺🔁	🧺		
Carrots	🌱	🌱	🧺🔁	🧺🔁	🧺🔁	🧺	🧺	
Beets	🌱	🌱	🧺🔁	🧺🔁	🧺🔁	🧺	🧺	
Turnips		🌱	🧺🔁	🧺🔁	🧺🔁	🧺		

Green Onions	🌱	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺🔁	🧺	🧺

🔁 CROP REPLACEMENT STRATEGY GRID

(What to plant AFTER you harvest something)

This grid shows how one square can host **3–4 crops in one season.**

First Crop (Spring)	Harvest Month	Replant With	Harvest	Final Fall Crop
Radishes	April	Bush Beans	July	Spinach
Spinach	May	Cucumbers	August	Lettuce
Lettuce	May	Peppers	September	Kale
Peas	June	Zucchini	August	Arugula
Broccoli	June	Bush Beans	August	Turnips
Carrots	June	Basil	August	Spinach

🧭 HOW TO USE SUCCESSION PLANTING (PUT THIS ABOVE THE GRID)

Rule #1 – Never Leave Soil Empty
The moment one crop finishes → plant the next within 48 hours.

Rule #2 – Fast Before Slow
Spring: fast crops (radish, lettuce, spinach)
Summer: heavy producers (beans, cucumbers, zucchini)
Fall: cold crops (kale, spinach, arugula)

Rule #3 – Every Square Has 3 Lives
Each square should host:

- Spring crop
- Summer crop
- Fall crop

That’s how a 25-square garden behaves like a **75-square garden.**
